Principal Product Designer with over 15 years experience specializing in enterprise B2B SaaS, operational workflows, and complex systems. Combines data-driven design with AI-enabled workflows to answer technical questions upfront, stress-test data models, and ensure cross-functional alignment to rapidly deliver experiences that make hard work feel simple for users.

Work Experience

Lead UX Designer at ADP • Mar 2022 – Oct 2026

- Led the end-to-end UX vision for the internal CRM platform, creating a unified workspace relied on daily by over 18,000 global service associates.
- Replaced disjointed multi-step wizards with standardized guided flows, reducing average case resolution time by 45% and eliminating cognitive overhead across high-volume service queues.
- Embedded human-in-the-loop Generative AI into the Salesforce CRM ecosystem, designing clear summaries, transparent source attribution, and seamless override states that protect audit compliance and associate trust.
- Prototyped interactive components directly in React, Tailwind CSS, Cursor, and Claude to pressure-test dense data tables, dynamic permissions, and edge cases alongside engineering and product leadership.
- Governed organization-wide design standards and component libraries, running cross-functional workshops that aligned product, engineering, and service leadership across distributed teams.
- Mentored mid-level and senior designers in systems thinking, operational metrics, and code-assisted prototyping workflows.

Lead UX Designer at UKG • Aug 2021 – Mar 2022

- Led the UX strategy to integrate newly acquired software into the core HCM platform, turning disjointed patterns into a unified enterprise ecosystem.
- Defined a long-term roadmap for platform usability and consistency to future-proof the design system through rapid business growth.

Senior UX Designer at Prosight Insurance • Apr 2018 – Aug 2021

- Designed an automated rating engine and self-service portal for policy issuance and real-time underwriting, eliminating manual intake bottlenecks and driving operational scale.
- Translated complex actuarial logic, regulatory mandates, and underwriting rules into clean, multi-variable tables and self-service agent workflows, sharply reducing support call volume.

Product Designer at SPS Commerce • Nov 2015 – Dec 2017

- Designed enterprise retail supply chain analytics dashboards and an internal ETL diagnostics console that reduced support resolution time.

Design Team Lead at Fareportal • Apr 2013 – Oct 2015

- Led a multidisciplinary team in the responsive redesign of CheapOair, doubling mobile booking conversion across high-traffic travel platforms.

Mobile UX Designer at Usablenet • Jul 2011 – Mar 2013

- Designed responsive mobile web and native app experiences for Fortune 500 eCommerce, travel, and hospitality clients.

Education

The College of New Jersey • BA: Interactive Multimedia Dec 2008

IDEO U • Human-Centered Service Design Feb 2020

Anthropic • AI Fluency Framework & Foundations Nov 2025

Core Skills

Systems & Workflow Modernization • Enterprise B2B SaaS, Service Blueprints, Information Architecture, Guided Flows, Data Modeling, Design Systems Governance, Cross-Functional Alignment.

AI & Agentic UX Design • Human-in-the-Loop Oversight, Explainable AI, Provenance & Source Attribution, Confidence Indicators, Error Recovery & Manual Overrides.

Technical Prototyping & Tools • React, Tailwind CSS, Cursor, Claude, Figma, Git, VS Code, Salesforce Lightning (SLDS), Miro, Agile/Lean UX.

Product Strategy & UX Leadership • UX Strategy, Systems Thinking, Workflow Optimization, Product Discovery, Stakeholder Alignment, Cross-Functional Leadership, Design Mentorship
